

March 1, 2021

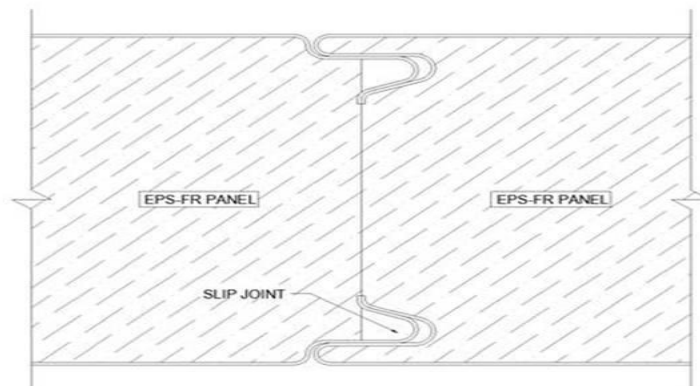

Dear Delta Panels,

I am writing to advise that the Insulated Panel Council Australasia Ltd. (IPCA) has had the Fire Test Certificates (FTC) updated to reflect reference changes made in the National Construction Code (NCC) and the name on the FTC's updated to reflect IPCA as the owning body.

Under the conditions listed below, IPCA authorises your Company to use these documents to certify that the EPS-FR cored Insulated Sandwich Panel that you manufacture meets the NCC requirements regarding determination of Group Numbers.

CONDITIONS OF USE

- Your Company remains a paid-up financial member of IPCA.
- These test reports should be read in conjunction with the current version of the IPCA Code of Practice.
- Panels manufactured must include:
 - EPS core material to be Class SL (made to AS 1366.3) and include a self-extinguishing fire retardant (FR) material.
 - Steel skins to be Colorbond® steel with a 0.4mm thickness or greater.
 - Steel skins to be bonded to the EPS-FR core with a two-part heat polymerising adhesive by means of a continuous laminating process.
 - Slip joints and roll forming processes must provide and interlocking tongue and grove style joint (see diagram below).

CONDITIONS OF USE – continued

- Installation of all EPS-FR cored Insulated Sandwich Panels must conform to the Test Standard AS ISO 9705 and the details expressed within the respective reports to meet the Group Number in accordance with AS 5637.1.

These updated FTC's should allow Certifiers/Surveyors to approve EPS-FR cored Insulated Sandwich Panels used on projects in a timely and efficient manner for all.

As always, should you have any questions or require further information please do not hesitate to contact me.

Sincerely,

Allen Mitchell | Chief Executive Officer
